

# 1672. Richest Customer Wealth

Solved 

Easy

 Topics Companies Hint

You are given an  $m \times n$  integer grid `accounts` where `accounts[i][j]` is the amount of money the  $i^{\text{th}}$  customer has in the  $j^{\text{th}}$  bank. Return *the **wealth** that the richest customer has*.

A customer's **wealth** is the amount of money they have in all their bank accounts. The richest customer is the customer that has the maximum **wealth**.

## Example 1:

**Input:** `accounts = [[1,2,3],[3,2,1]]`

**Output:** 6

**Explanation:**

1st customer has wealth =  $1 + 2 + 3 = 6$

2nd customer has wealth =  $3 + 2 + 1 = 6$

Both customers are considered the richest with a wealth of 6 each, so return 6.

## Example 2:

**Input:** `accounts = [[1,5],[7,3],[3,5]]`

**Output:** 10

**Explanation:**

1st customer has wealth = 6

2nd customer has wealth = 10

3rd customer has wealth = 8

The 2nd customer is the richest with a wealth of 10.

## Example 3:

**Input:** `accounts = [[2,8,7],[7,1,3],[1,9,5]]`

**Output:** 17
